---

EDUCATION

Front-end Engineer Certificate   Current

Codecademy (remote) | Hands-On, Project-Based Training
- Front-end engineers work closely with designers to make websites beautiful, functional, and fast.
- The curriculum includes web foundations, improved styling with CSS, and building interactive websites.

Java Foundations Certificate   September 2022

Kenzie Academy from SNHU (remote) | Hands-On, Project-Based Training
- 6-month boot camp in Java Foundations.
- The curriculum included Java syntax, data structures, design patterns, and its interaction with the Real World.

TECHNICAL PROJECTS & EXPERIENCE

Trivia Game, Sole Contributor | [GitHub](#)   September 2022

Tech Stack: Java, IntelliJ, JSON, API, HTTP, DTO
- Design a UML chart to arrange how the Trivia Game would work with the Java Classes.
- Coded Java Classes with their corresponding methods, constructors, variables, loops, and/or conditions for the Game to work as expected.
- Map JSON data to Data Transfer Object(DTO) in order to implement the HTTP request successfully.
- Initiated HTTP GET request to pull questions from the API with its corresponding category for the user to play the Trivia Game.

Stock Trading, Contributor | [GitHub](#)   September 2022

Tech Stack: Java, IntelliJ, Classes, Methods, Constructors, Visibility

- Built a Stock Holding Class with instance properties and methods to utilize in the Main Class for the Trading to work smoothly.
- Applied methods from the Stock Holding Class in the Main Class to check balance and buy or sell stock appropriately.
